CFO Solutions that help companies grow

# excellence

We pride ourselves on understanding the problems and opportunities associated with companies in early development. CFO Connect® is committed to excellence, a quality found in all of our services. Our clients are our greatest asset and we are continually dedicated to serving their needs.

CFO Connect provides part-time CFO services to early- and mid-stage venture-backed life science and technology companies. Our credentials and experience pave the way for improved productivity and greater gains for your business.

“ CFO Connect delivered the results that I expected, and served as a trusted member of the team. They instilled financial discipline in a high-growth environment, and helped to organize the founding team for success.”  
- Marco Thompson,  
Express Ventures

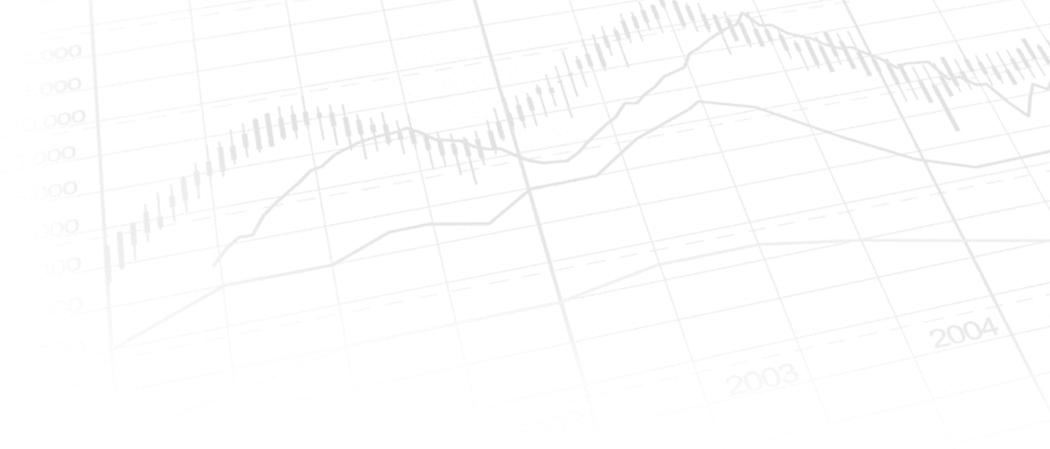

# reinventing

CFO Connect<sup>®</sup> enables a company to focus on core competencies while providing the necessary financial expertise and administrative support tailored to an affordable budget.

# the CFO

## Our Focus

Our services are focused on venture-backed early- and mid-stage companies doing business in the life science and technology industries. Our CFOs have developed core competencies in working with these particular types of companies and are familiar with all that goes into growing and supporting them. CFO Connect has built a network of relationships with venture capital firms, hedge funds, angel investors, law firms, venture banks, accounting firms, insurance firms and a host of other service groups that all come into play as the business begins to grow. We know what it takes to get a company started, organized and ready for the first stages of early growth.

## Part-Time CFO Services

CFO Connect® provides early- and mid-stage venture-backed companies with part-time CFOs through a dedicated, long-term, part-time relationship determined by the needs of the organization.

Our CFO services include:

- Performing all the traditional duties of a CFO
- Working synergistically with the Board of Directors, Chief Executive Officer (CEO) and management team as the senior financial member
- Providing necessary fiscal expertise, thereby allowing the CEO and other team members to focus on their core competencies
- Assisting the management team at the strategic planning level to realize business plan goals
- Naturally integrating into the management team, offering the full benefits of a CFO at substantially less cost than a full-time CFO
